LAUNCH GLOBAL

The embedded hiring partner for founders scaling faster than they can hire.

There isn't enough of the talent you need, in the market you're looking in, and every hour spent chasing recruiters or compliance paperwork is an hour not spent on your business. **That's not a failure. It's a resourcing problem, and it has a fix.**

01
EMBEDDED

One dedicated partner, inside your team.

A real embedded advisor who works as an extension of your business, not an agency you call only when a role opens up. Same advisor, same context, every hire, plus delivery reporting and market intelligence that stays with you.

02
TIME

Focus on selling, not sourcing.

While we build and run your hiring engine, you spend your time on product and revenue. You get the ownership of an internal hire without adding the headcount, and without managing several agencies yourself.

03
RISK

Global talent, safely accessed.

Vetted partners, compliant delivery, and one accountable point of contact, wherever the right candidate is, not just where your postcode is.
